

- High speed transactions
- Solution for integration with cash register
- Tip feature
- Pre-authorisation feature
- Card-not-present transactions

What are the benefits of the bankcard acceptance service for you?

- Extra services, increased competitiveness, growing customer satisfaction
- The launching of the service will not mean initial investment and costs for you
- Normally, shoppers paying with bankcards spend more than those paying with cash (the bankcard paying shoppers are more inclined toward impulsive shopping)
- People tend to carry less cash on them, and if possible they prefer paying by bankcard when the purchase price is a large sum
- The foreign customers normally prefer shops where they can pay by bankcard
- Protection against forged bank notes. There is no need to store safely large sums of cash
- There is no return change, you need not provide for the changing of bank notes of large denominations

MKB Bank cooperates in the process so that it forwards your request to SIX Pay then it continuously monitors the contract conclusion and installation thus helping you to introduce the bank card acceptance service in your outlet as soon as possible.

In addition, MKB Bank will be at your service with an offer of high standard banking services, including the management of your bank account turnover arising from bankcard acceptance.

What do you need to do if you want to receive an offer from SIX Pay?

Please contact your MKB sales representative, who will help you to complete the documentation required for requesting an offer.

SIX Pay – An absolutely reliable partner

SIX Pay is a financial service provider based in Luxembourg and specialised in merchant acquiring, with a sales network of country-wide coverage in Hungary that provides card acceptance services to more than 1000 merchants in Hungary.

The activities of SIX Pay now extend to over 25 countries, and it is a leading player of the European bankcard acceptance market, providing wide ranging card acceptance services covering debit and credit cards issued under the trade marks of the most widely recognised international card organisations. Added value services such as Dynamic Currency Conversion (DCC) at the point of sale complete the offering of SIX Pay.

What type of bankcards can be accepted with the solution offered by SIX Pay?

SIX Pay currently offers a solution for the acceptance among others of the following bankcards:

SIX Pay – Financial security

- Financial stability provided by the international SIX Group
- Secure, constantly controlled IT background
- Continually expanding activities covering more than 25 countries
- Secure management of data conforming to the most stringent international standards on customer and card data storage (PCI Data Security Standards)

SIX Pay – One-stop shopping

SIX Pay provides a full-scale solution for card acceptance via POS-terminals located at stores and service units, and the location could be either a small shop or a retail chain with country-wide coverage.

All bankcard acquiring services available from a single supplier

- Dedicated contact person
- Installation, repair and regular maintenance of the POS-terminals
- On-the-spot training during terminal installation
- 24 hours a day customer service on every day of the year
- A unique service in the market: DCC (Dynamic Currency Conversion) solution with its Best Rate Guarantee providing a choice to international customers between payments in local or home currencies

A broad choice of POS-terminals

SIX Pay offers to customers a wide choice of POS-terminals equipped with the most advanced technologies and suitable for accepting chip cards, including portable, touch-free terminals and ones furnished with embedded or external PIN pads. The terminals – adapting to the communication means available at the store – are able to communicate via the phone line, the Internet or via mobile networks (GSM/GPRS).

Key characteristics of the POS-terminals installed by SIX Pay

- Modern, aesthetic design
- Reliability
